Investing Scorecard + Allocation-by-Age Worksheet

Financially Sovereign Academy · Module 7: Investing Fundamentals · Worksheet v0.1 · 2026-07-04

What this is. A scorecard slows you down before you buy anything, so you invest on purpose instead of on impulse. This one page is reusable; copy the questions each time. Fill it in by hand. This is not a stock tip and not personalized advice. Example amounts are examples only; use your own numbers.

---

1. Before I buy: simple check questions

From Module 7, answer these honestly before any purchase.

- ☐ Do I understand what this is in one plain sentence?
- ☐ Do I know how it makes money over time?
- ☐ Do I know the fees I will pay?
- ☐ Can I leave this money invested for years without needing it?
- ☐ Am I buying because of a plan, not a hot tip or fear of missing out?
- One sentence describing what I am buying: ____________________________________

2. Allocation split

Allocation just means how you divide your money across types of investments. A common rough idea is to hold a larger share in steadier investments as you get older, but there is no single right split.

- My age: ______
- Rough share in stocks (growth, more ups and downs): ______ %
- Rough share in bonds or steadier holdings: ______ %
- Rough share in cash or savings: ______ %
- These should add up to about 100 percent. Total: ______ %

3. Fee-drag reminder

Small fees quietly eat returns over many years. Lower fees leave more for you.

What I am comparing	Option A	Option B
Yearly fee (expense ratio or similar)	______ %	______ %
Any account or advisor fee	$ ______	$ ______
Lower total cost (circle)	A	B

- The one with lower fees, all else equal, is usually the better default.

4. Match my time and stomach

Investing that keeps you up at night is hard to stick with.

- How long until I need this money: ____________
- How I feel about a temporary drop: fine · uneasy · very uneasy
- Does my plan match how I actually feel? [ ] Yes [ ] Needs adjusting

5. Pressure and trap reminder

From Module 7: urgency is a sales tactic. “Get in now” and “guaranteed returns” are warning signs, not opportunities. Nothing here is a stock tip.

- One hyped thing I will not buy on impulse: ____________________
- My cooling-off rule before buying: wait ______ days

6. My next 7-day action

One small thing I will do in the next 7 days: ________________________________
____
