

Debt Inventory Worksheet

Financially Sovereign Academy · Module 5: Debt Strategy · Worksheet v0.1 · 2026-07-04

What this is. You cannot make a plan for debt you have not written down. This one page helps you list every debt in one place and pick an order to pay them. Fill it in by hand. Example amounts are examples only; use your own numbers.

1. List every debt

Put them all in one place, even the small ones.

Debt name	Balance	APR (interest rate)	Minimum payment
_____	\$ _____	_____ %	\$ _____
_____	\$ _____	_____ %	\$ _____
_____	\$ _____	_____ %	\$ _____
_____	\$ _____	_____ %	\$ _____
_____	\$ _____	_____ %	\$ _____
Totals	\$ _____		\$ _____

2. Pick your order

From Module 5, there are two common orders. Neither is “correct” for everyone.

- **Avalanche:** pay extra on the highest APR first. Saves the most on interest.
- **Snowball:** pay extra on the smallest balance first. Gives quick wins for motivation.

My choice this month (circle one): Avalanche · Snowball · _____

3. My payoff order

Number your debts in the order you chose above.

Order	Debt name	Balance	APR
1	_____	\$ _____	_____ %
2	_____	\$ _____	_____ %
3	_____	\$ _____	_____ %

- Extra amount I can add to the first one this month: \$ _____

4. Keep minimums safe

While you attack one debt, keep paying at least the minimum on all the others so nothing slips.

- ☐ I know every minimum payment date this month
- ☐ I have a reminder set for each one

5. Pressure and trap reminder

From the module: before new debt jumps ahead of your basics this week, pause. New borrowing can push out rent, food, or getting to work.

- The “does it jump this week’s line?” check: will this new payment crowd out a must-pay bill this week? [] Yes [] No
- If yes, what I will do instead: _____

6. My next 7-day action

One small thing I will do in the next 7 days: _____
